Bring Burkhard Heim's Groundbreaking Work to Life!

Imagine... A forgotten genius. A theory uniting quantum mechanics and relativity. A chance to change our understanding of reality itself. Sounds like science fiction? Yet this is exactly what the work of German physicist **Burkhard Heim** is about. **And you can help make it accessible to the world.**

Why now? Why Heim?

Burkhard Heim (1925–2001) dedicated his life to a revolutionary theory bridging Einstein and quantum physics. Despite severe injuries from a lab accident, he developed a complex but highly promising model of reality. However, his ideas have remained largely hidden: **locked away in German technical jargon, unknown to most scientists.** That has to change. **Now.**

Our mission

The **Cosmic Water Foundation** is committed to bringing Heim's work into the spotlight. Here's what we plan to do:

- Translate his theory into clear, academically usable language;
- Organize publications and workshops;
- Foster international collaboration;
- Integrate Heim's insights into physics education worldwide.

In short: we want to unlock Heim's work for science — and for the future.

What do we need?

Good news: Wetsus, Europe's top centre for water technology, recognizes the immense value of Heim's theory, especially for water research. They are already funding 75% of a theoretical PhD project. **But:** To fully launch it, we still need **€132,000**, spread over four years. **And that's where you come in. Every contribution — big or small — brings us closer!**

What's in it for you?

- Exclusive updates on the project's progress;
- Invitations to symposiums and presentations;
- Acknowledgment (anonymous if you prefer) in publications;
- The satisfaction of contributing to truly pioneering scientific work.

Will you join us?

We're looking for:

- Brave thinkers,
- Curious minds,
- Visionaries willing to invest in science beyond the mainstream.

Are you one of them?

Let us know what you would like to pledge. We will only ask for actual donations once the full amount is committed. **This way, everything remains safe, transparent, and collective.**

Want to know more?

Questions, ideas, or simply want to brainstorm with us? We're open to hearing from you! Together, we can ensure that this unique knowledge isn't lost — but instead inspires a new generation.

With gratitude and curiosity,

Gerrit Oudakker
